| Average time taken to re-let vacant<br>Council homes   | Target not met – performance<br>down on Q2 and Q3 last year  | Of the 61 properties re-let in Q3, 32 took 5 weeks or more — the longest taking 17 weeks. Properties are advertised as soon as the outgoing tenant gives notice but delays in bringing them back to lettable standard can have a knock-on effect. Work to bring properties back to our standard has taken longer. Very specific properties can be more difficult to re-let — e.g. a disabled adapted bungalow took longer to let in Q3. Property and Housing are working closely to identify quick wins and continue to meet weekly. Longer term, the new housing system will allow us to plan more proactively and identify improvement works for completion during occupation which will have a positive impact.   |
| Health & Safety accidents  | Number of accidents exceeds the annual target – same as Q2 up compared to Q3 last year   | 13 accidents as at Q3, against an annual target of 12 - 5 accidents in this quarter – all within the Property team.  |
| Number of visits to combined leisure centres   | Target not met - down compared to Q2 and Q3 last year  | Historically Q3 is a low performing period with increased attendances anticipated during Q4.   |
| Staff sickness   | Target not met – although sickness reducing  | At 6.79 days per FTE, sickness is high. However, it is much better than both a year ago (7.77) and Q2 (7.71). HR continues to support managers – e.g. through recent absence management workshops – to minimise absence and develop improvement plans for services with high absence rates. Wider staff engagement, e.g. briefings and staff survey, is supporting culture shift and improving morale.   |
