

End of project impact report

Grant Awarded: £2,128.48

Date Awarded: 7 March 2019

Organisation Details

Name: Hambleton Players

Address: ___Hambleton Village Hall,
3 Station Road, Hambleton, Selby,

Postcode: _YO8 9HS_____

Project Details

Project Title / Description: ___Hambleton Players – LED
Lighting_____

Contact Name: __Jon Welburn_____

IMPACT REPORT FOR PERIOD ___March 2019_____ TO ___June 2019_____

Q1 In no more than 500 words please outline the key outcomes of your project.

With the grant money Hambleton Players were able to buy some much needed LED lighting to replace the old filament lights. With this new lighting the effects we can create has greatly affected the production values of the show making it a much more enjoyable show for both members and audience. Additionally, LED lighting is more cost effective reducing the effect on the environment.

Q2 In no more than 500 words please demonstrate how the project has met the Community Development Plan objectives that were identified in the original application for funding.

Hambleton Players production of The Addams Family in June 2019 saw one of our most popular shows with our audience and has increased our audience base by word of mouth. We have had many of the audience members commenting on how well the stage was set and how atmospheric it looked. This was not fully possible with our previous lighting. We have also been able to re-use some of our backdrops, for instance, a woodland scene used in our last pantomime was transformed into a 'spooky' woodland scene for the Addams Family. The signed performance was greatly appreciated, having to be able to effectively light the signer for the deaf members of our audience. Since this show we have been asked by many people to join the group, in all age categories, to work both on and off stage, increasing the community spirit.

Q3 In no more than 250 words please give details of any additional benefits or objectives that the project has met that were not anticipated/ outlined in the original application for funding.

LED lights can produce many different coloured lighting effects from one single unit so the range of colours used can alter a scene very easily to match the show we are producing. An added bonus is that the lights can be fed through the sound system so that key light changes can be made throughout a song enhancing the production and the audiences' enjoyment.

Any other comments on the project and its success:

Hambleton Players main objectives have always been to be a fully inclusive membership and to put on a high class production from a village hall bringing together the community.
