

Selby District Council: Taxi Licensing Policy

6. Accessibility and taxi vehicle requirements

In regulating the taxi and private hire trade we aim to meet the diverse needs of all accessibility requirements in our district. This includes wheelchair users, the visually impaired, the elderly and other groups that may be disabled or otherwise have accessibility requirements. We do not place any restrictions on private hire vehicle types, but we do check that they are safe. For taxis, we uphold a ratio of 70% wheelchair accessible vehicles and 30% non-wheelchair accessible vehicles. The process by which this is maintained is outlined below.

6.1 New vehicles with new applicants

Where a new application for a hackney carriage vehicle licence is made, the licence will only be granted if the vehicle is wheelchair accessible.

6.2 Replacement vehicles

An existing vehicle may be replaced by a vehicle of similar type. All wheelchair accessible vehicles may only be replaced by another wheelchair accessible vehicle. There are a number of saloon-type vehicles in the fleet; these may be replaced by either a wheelchair accessible vehicle or another saloon

Current hackney carriage drivers licenced to drive a wheelchair accessible vehicle can make a request to be added to the waiting list to change their vehicle to a licence for non-wheelchair accessible vehicle (Appendix D).

In the event that a licence for a non-wheelchair accessible vehicle becomes available i.e. when an existing licence holder of a non-wheelchair accessible vehicle surrenders their licence, or where monitoring identifies a need for more non-wheelchair accessible vehicles, those on the waiting list will be considered for the available licence(s).

6.3 Assistance dogs

Taxis must carry guide/assistance dogs at no extra charge. Refusing to carry a disabled person on the basis of their disability is discrimination, and is a serious criminal offence.

6.4 Definition of wheelchair accessible vehicles

Wheelchair access and egress may be made via the side doors or rear doors. All vehicles that are wheelchair accessible must be so constructed as to facilitate the carriage of people with disabilities. It must be capable of accommodating a wheelchair user in a wheelchair in the passenger compartment, provided that the wheelchair fits either facing forwards or rearwards as recommended by the Disabled Persons' Transport Advisory Committee and

APPENDIX 1

the Medical Devices Agency. Under no circumstances must the wheelchair be placed sideways in the passenger compartment.

Approved anchorages must be provided for the wheelchair and the wheelchair user. These anchorages must be either chassis or floor linked and capable of withstanding approved dynamic or static tests. Restraints for wheelchair and occupant must be independent of each other. Anchorage must also be provided for the safe stowage of a wheelchair when not in use, folded or otherwise, if carried within the passenger compartment. They must be designed so as not to cause injury to other passengers.

A ramp or ramps for the loading of a wheelchair and occupant must be available at all times for existing wheelchair accessible vehicles. The entry must be either via the nearside passenger door or via the rear. An adequate locking device must be fitted to ensure that the ramps do not slip or tilt when in use. Provision must be made for the ramps to be stored safely when not in use.
